

EDUCATION PROGRAMS 2026-2027

INTO AMERICA'S WILD

New Movie
page 9

Create a personal connection to your lessons and drive classroom engagement with an unforgettable, entertaining, and educational class trip to the Cradle of Aviation Museum.

Now in our 24th year, thousands of school groups have been captivated by their experience at the Cradle of Aviation. Our Education Department will curate your day with affordable, customized programs from 30 minute lessons to a full day of education and activity to meet your needs. Led by educators, all of our classes and programs are STEM-based, hands-on, and developed to comply with the NYS Science Learning Standards.

Your students can walk through the history of flight and the rich history of our region through guided museum classes, theater shows, and our Aerospace Quests. Additionally, they can enjoy lunch from our fully operational cafeteria and visit our museum store. Each of our eight museum galleries will deliver a “WOW” moment as students travel through time with over 75 air and space craft from hot air balloons and kites to jet aircraft and an actual lunar module on the Moon.

Studies show that museum trips teach critical thinking, allow for real-world experiences, and improve test grades. And above all they are fun. When you ask students about some of their favorite memories from school, they often recall their eye-opening field trips.

So plan a visit to the Cradle of Aviation Museum and Education Center for an exciting, educational, and memorable adventure in a world-class museum that’s right in your own backyard.

“Opportunities to learn STEM outside of school directly affects what is possible inside classrooms, just as what happens in classrooms affects out-of-school learning.”

~ Report by the National Academies of Science, Engineering, and Medicine, August 2015.

Museum Classes

Exploring the Web of Life - grades 2-5 (30 minutes)

Delve into the fascinating relationship between habitats and ecosystems. Discover how different habitats, from oceans to deserts, shape and influence the overall functioning of ecosystems and gain a deeper understanding of the interconnectedness of living organisms and their environment.

Robots: Healthcare Magic - grades 3-5 (30 minutes)

Step into the exciting world of medical robotics and discover how cutting-edge technology is transforming the way doctors care for patients. Through engaging, hands-on activities, students will experience the importance of precision by testing their skills with an Operation game and exploring how a rehabilitation robotic glove helps patients regain movement after injury. This interactive STEM class inspires young learners to see how engineering, robotics, and medicine work together to improve lives and shape the future of healthcare.

AI Takes Flight - grades 4-8 (30 minutes)

From facial recognition at check-in to robot assistants guiding passengers, students will explore real-world applications of AI through interactive role-playing and engaging discussions. They'll step into the shoes of smart machines and discover how technology helps manage baggage, enhance security, and maintain clean terminals. This hands-on experience blends innovation and imagination to show how AI is taking flight in the skies—and on the ground!

Engineering the Future - grades 4-8 (30 minutes)

This class introduces students to the innovative ideas that the engineers of the future are developing right now. Curious minds will light up with wonder as we put the engineering design process to use to develop our own sustainable innovations, exploring concepts such as hydropower, wind power, autonomous flying taxis, and more.

Physics at Play - grades 2-9 (30 minutes)

What do your favorite sports and toys have in common? They all follow the laws of physics! In this interactive lesson, students will learn how physics is at the foundation of sports and games and how they can better understand their favorite activities by understanding the science behind them.

Find-a-Flight - grades 3-8 (30 minutes)

Ever see an airplane up in the sky and wonder where it is going? In this lesson, students will learn about flight tracking software and use it to plot the routes of airplanes flying into, out of, and over New York. They'll learn about different places in our own country and around the world.

Code-a-Drone - grades 5-12 (30 minutes)

Drones are becoming more and more a part of everyday life, and in this hands-on program, students will learn how they function. Students will learn how drones are programmed to fly safely and then have the opportunity to code a drone of their own to fly over, under, and around obstacles.

Museum Classes

Living in Space - all grades (30 minutes)

There are many things one needs to know before venturing up into space...like how does one go to the bathroom? The most common and practical questions will be answered on what life is like in space. Students will discover where to sleep, what kind of food is available, what astronauts wear, and what some hazards are.

Mission mARs - grades 5-8 (30 minutes)

Students will blast off on a mission to the red planet using augmented reality software in this fast-paced and fun program. They'll land a rover on the Martian surface, drive around, and even have a chance to interact with virtual 3D objects, all while learning about the machines we sent to Mars.

3,2,1 Blastoff - grades 4-12 (30 minutes)

Can you imagine taking off in a rocket with powerful boosters? Rockets are the cornerstone of space exploration and help us to better understand our universe! Learn more about how rockets propel people and machines beyond Earth's atmosphere while experimenting with basic types of rockets.

How Does it Fly - grades 1-8 (30 minutes)

What are lift, drag, thrust, and gravity? They are just a few of the concepts explored in this hands-on program that covers the scientific principles of flight and how people used them to conquer the sky.

Kites - grades K-3 (30 minutes)

3000 years ago people in China invented the first kites, and today most of us have attempted to fly one. Learn how kites were precursors to other flying machines and build your own.

Guided Tour - all grades (50 minutes)

From ballooning to the Moon...an evolution of aviation, all in under an hour. This museum educator-led program will take your group through the museum's collections, focusing upon major events and aircraft in aviation history. Inquiry-based learning will help students interpret the history of aviation on Long Island according to the age level and needs of each group. ENL option is available upon request.

October-November SAVE \$2.00 per Student on Museum & Theater Combo Tickets!
January: Purchase Museum & Theater Combo Tickets and Receive a Free 30-Minute Program.

All classes comply with national and state standards.

Outreach Programs

Museum Outreach - We Come to You!

Make learning come alive for children and adults in a variety of settings, including schools, libraries, camps, scout meetings, and community centers.

Led by museum educators, all programs use hands-on demos to promote the museum's philosophy of inspiring and educating while entertaining.

Portable Planetarium!

The portable planetarium can accommodate up to 30 people per session. Once inside the dome, discover the majesty of the stars and universe. The portable planetarium has a stand-up entrance, permitting easy entry for students and teachers, and is best suited for your gym or auditorium.

Museum Classes Available for Outreach

In addition to our portable planetarium, we can also bring the following museum classes to you:

- Kites
- Living in Space
- How Does It Fly
- Mission mARs
- Find-a-Flight
- Physics at Play

Find
Museum Class

pages 4-5.

Nassau County Outreach Pricing

45 Minute Base Class	\$400.00
45 Minute Base Planetarium Program	\$550.00
Additional Same-Day Classes/Programs	\$60.00

Please call for outreach pricing in Suffolk, Queens, and Kings counties.

Outreach programs for schools are age-appropriate and designed to address New York State Learning Standards.

To find out more, book a program, or even create customized activities, please email outreach@cradleofaviation.org.

Competitions

2026-2027 Competitions

Build Beyond: Invent Tomorrow Challenge

Professional Development

CTLE Certified Teacher Workshops

Join the Cradle of Aviation Museum for dynamic, hands-on professional development opportunities designed specifically for educators. Our workshops are scheduled at the start of the academic year and typically run for 2-3 hours, offering practical strategies and engaging content that you can apply directly in the classroom.

To explore our upcoming professional development offerings and register, please visit www.cradleofaviation.org/pd

In addition to our scheduled programs, we'd be delighted to collaborate with you to design a customized professional development experience tailored to your school or district's curriculum needs. For information on custom program rates, please contact us at 516-572-4029.

Free Preview for Teachers

If you would like to see what we offer for programs, preview a theater show or just take a look around, do not hesitate to call! Teacher screenings and sneak peeks are free here at the Cradle. Reservations are required. Please call (516) 572-4029.

Planetarium Dome Theater

NEW! Into America's Wild - All Grades

Into America's Wild takes audiences on a breathtaking giant-screen adventure across some of the nation's most awe-inspiring natural wonders. From rugged coastlines and towering mountains to remote wilderness and national parks, the film showcases the beauty, diversity, and spirit of exploration that define the American experience.

Ocean Paradise - All Grades

Ocean Paradise transports viewers to the far reaches of the Pacific Ocean, showcasing untouched marine national monuments. These islands, atolls, and coral reefs teem with wildlife and natural beauty, offering a glimpse into pristine environments vital to our planet's health. The film highlights their critical role in combating environmental threats like climate change, rising sea levels, ocean acidification, overfishing, and plastic pollution.

Living in the Age of Airplanes - Grades 4+

Not long ago, traveling between continents was a migration. Now, on any given day, 100,000 flights transport people and things between any two points on Earth in a matter of hours. Filmed in 18 countries across all seven continents, Living in the Age of Airplanes explores the numerous ways aviation impacts our lives. The film renews our appreciation for one of the most extraordinary and awe-inspiring aspects of the modern world.

Cities of the Future - Grades 3+

Imagine stepping 50 years into the future and finding smart cities designed to be totally sustainable. Renewable energy is our primary power source. Everything is recycled. And you can ride an electric flying vehicle! Engineers are making plans for a sustainable world right now, and you can see it on the giant screen!

Solar System Tour - All Grades, Educator-Led

Our Solar System has everything you could want! Planets! Moons! Asteroids! Comets! All swirling around our one and only star, the Sun. Students will visit and explore the different objects of the Solar System and get a glimpse at the force that keeps worlds spinning.

Current Night Sky - All Grades, Educator-Led

Long before television, GPS, and streetlights, there were the stars of the night sky. Students will travel through the seasonal night sky to see constellations, hear mythical stories, and observe the magnificent Long Island sky.

Jetsetters - All Grades, Partially Educator-Led

Spark your students' curiosity with this hybrid planetarium program! First, observe the skies over Long Island with one of our museum educators. Then watch a 30-minute show! You can explore the night sky with friends from Sesame Street in One World, One Sky: Big Bird's Adventure; see deeper into space with Unseen Universe; or dive into the ocean with Ocean Paradise.

Life in Space - Grades 3+, Partially Educator-Led - Coming in late Winter

For the last 25 years, humans have established the International Space Station as a habitat and laboratory to deepen our understanding of how to live in space. Students will explore how these experiments on the ISS will help us travel even further out into space!

Planetarium Dome Theater

Sky Theater Planetarium

Our full-dome theater is a large-scale immersive environment, featuring real-time digital planetarium visualization and large-format cinema.

Grades 3+, Partially Educator-Led
COMING LATE WINTER

Join us for an immersive experience in our Dome Theater and ask about accessibility too! Limited live programs are available in Spanish and open captioning for films is also available. Ask for more details when booking your program!

Schedule a Visit

Please call reservations, Mon.-Fri, 10:00-4:00 at (516) 572-4066

Booking - The following information is needed when booking

- Date of visit, arrival and departure times
- Number of visitors, including both children and adults
- Grade(s) of school group
- Chosen options
- Contact details
- Lunch requirements: purchase special box lunch or bring your own
- Accommodations such as ENL and accessibility needs, etc.
- Plan your store time

Arrival

- Please arrive on time and leave book bags on the bus
- Lunches will be collected and held until lunch time
- Review museum schedule
- Before disembarking your group, please check in at the Box Office
- If you should come late, rescheduling dome show times and educational programs are contingent upon ticket and educator availability

Requirements

- Supervision requirements is no fewer than one adult per ten children
- 1-week notice is required for reservation adjustments
- Adult chaperones must keep groups together and maintain order.
- NO FOOD, DRINK/WATER BOTTLES, GUM or BACKPACKS are permitted in the museum and theater

Museum	Theater Show	Museum & Theater Show	Museum Classes (30 min.)	Museum Classes (50 min.)
\$10.00	\$10.00	\$17.00	\$2.00	\$3.00

School Group Rates

- We accept cash, checks made payable to the Cradle of Aviation Museum, Master Card, Visa and AMEX
- Final numbers and full payment are due one week prior to the date of visit
- We reserve the right to cancel your reservation if payment is not made and a representative can not be contacted
- No refunds will be given if group numbers decrease after payment

SPECIAL DISCOUNTS DURING OFF-PEAK PERIODS!

October-November SAVE \$2.00 per Student on Museum & Theater Combo Tickets!
January: Purchase Museum & Theater Combo Tickets and Receive a Free 30-Minute Program.

Directions & Contact Info

Directions for Buses: Long Island Expressway, exit 39S, Glen Cove Road South. Glen Cove Road turns into Clinton Avenue. when you cross Old Country Road. Make a left onto Stewart Avenue. Take Stewart until you reach Eisenhower Park and make a right onto Merrick Avenue. On Merrick make a right at the first light onto Charles Lindbergh Blvd. Go two traffic lights on Charles Lindbergh and make a right into our parking lot. The entrance is the glass fronted Reckson Center building.

Hours

Monday: Open for Groups (Min. 100)
Tuesday–Sunday: 10:00–5:00

Address

Cradle of Aviation Museum
Charles Lindbergh Blvd.
Garden City, NY 11530

MacArthur Airport STEM Partnership

We are proud to continue our ongoing partnership with Long Island MacArthur Airport to inspire students to explore career pathways in aviation and aerospace through engaging, hands-on educational experiences. This 2.5-hour field trip offers students in grades 5–12 the unique opportunity to tour the airport and connect with a professional in one of the various roles: TSA officers, airline ticketing agents, fire rescue personnel, and aircraft mechanics. The program features our Find-A-Flight class, where students explore flight tracking software to plot real-time airplane routes into, out of, and over New York. They'll also gain insight into air traffic control and global geography, learning how flights are monitored to ensure safety in the skies. This collaboration enhances access to meaningful aviation education for schools across Long Island, especially those in the East End.

STEM Partnerships

Thinking of expanding your students' experience beyond a traditional field trip? We are too! The Cradle of Aviation Museum offers dynamic STEM partnership programs with individual districts, providing students access to engaging museum coursework and hands-on opportunities that may otherwise be out of reach. Through a series of visits—either in the comfort of your classroom or at the Museum—we expand project-based learning with real-world relevance.

Our new flagship initiative, the **Pathways to STEM Futures Partnership**, is designed for middle and high school students to explore workforce readiness through immersive experiences, industry connections, and real-world skill-building.

To learn more about partnership collaborations and customized programming, please call 516-572-4029. Let's build the future of STEM together!
